CRISC Certification Overview

The Certified in Risk and Information Systems Control (CRISC) certification by ISACA is designed for professionals who identify and manage enterprise IT risk and implement and maintain information systems controls. It is ideal for roles like IT risk managers, control professionals, compliance analysts, and security consultants.

1. Eligibility Criteria

- Experience Required:
  - 3 years of cumulative, paid work experience in at least 2 of the 4 CRISC domains.
  - One of the two domains must be either Domain 1 (IT Risk Identification) or Domain 2 (IT Risk Assessment).
- Timing of Experience:
  - Experience must be gained within the 10 years preceding the application or within 5 years after passing the exam.
- No Experience Yet?
  - You can take and pass the CRISC exam first, then accumulate the required work experience within 5 years to apply for the certification.

2. CRISC Domains and Weightage

- Governance | 26%
- IT Risk Assessment | 20%
- Risk Response and Reporting | 32%
- Information Technology and Security | 22%

3. Exam Fees

- ISACA Members: USD 575
- Non-Members: USD 760
- Format: Computer-Based Testing (CBT)
- Duration: 4 hours
- Number of Questions: 150 multiple-choice questions

4. Further Information and Registration

- Official Website: https://www.isaca.org/credentialing/crisc
- Study Resources:
  - ISACA's official CRISC Review Manual
  - Practice questions and exam simulators
  - Online courses on platforms like Infosec Institute, Coursera, and Udemy

5. Why Choose CRISC?

- Demonstrates expertise in enterprise risk management and control design.
- Recognized by employers globally across financial services, government, healthcare, and tech sectors.
- Enhances your credibility for roles in GRC (Governance, Risk, and Compliance) and strategic IT roles.
